Negotiator Thruster Complete Nozzle N6R

Negotiator Thruster Complete Nozzle

The Negotiator Thruster Nozzle was designed with traps and gullies in mind. The round short head allows the nozzle to pull the hose around a waste trap/gully without getting caught on most joints. It also makes a great 'general all round' penetrating nozzle. It has 6 rear thrust jets and no forward penetrating jet for pure thrust.

Made from Hardened Stainless Steel.
1/4" F BSP
